It all started with a Saab cupholder.

I happen to own a 2004 model, a family car with a turbo (don't ask). Way back in December, before everyone started wondering whether 3D printing was on the deadpool, I tested out a [MakerBot Replicator Mini](#) for a few weeks. It was a heady time printing out Darth Vader replicas from [Thingiverse](#) and experimenting with my own concoctions.

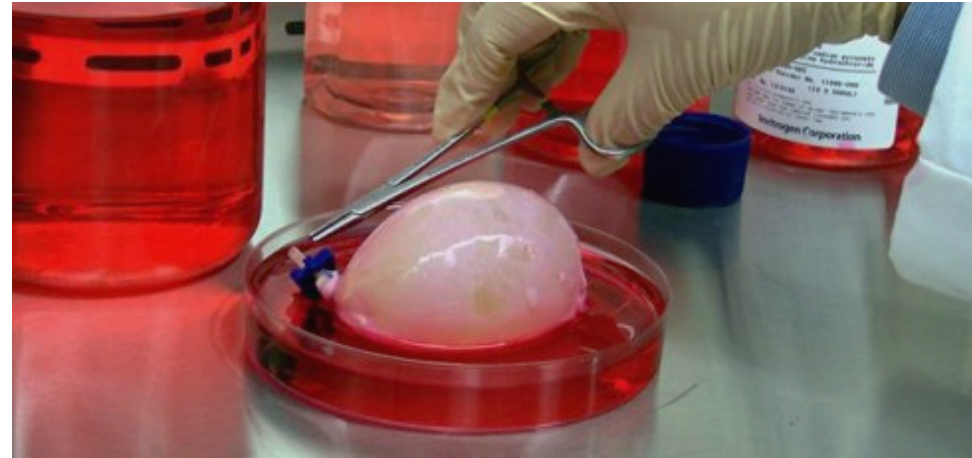

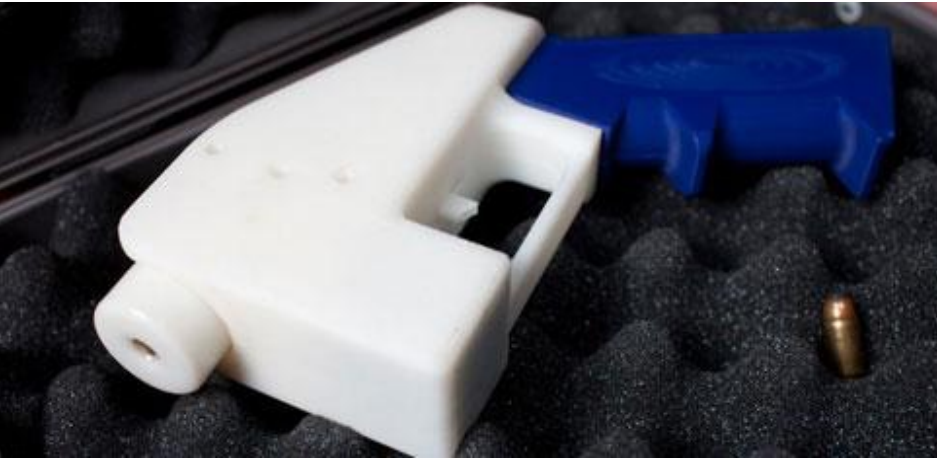

More than 278,000 desktop (under \$5,000) 3D printers were sold worldwide last year
